September 21, 2021

VGM Residents and Families,

In our communication of September 20, 2021, we identified that two (2) of our staff members tested positive for COVID-19. We have been diligently testing all VGM Residents and Staff with subsequent testing to occur later in the week.

Our Residents are currently spending their time in their rooms to minimize interaction with others until all of the test results are back. Residents are having room service for every meal, and our Staff are able to deliver crafts or other entertainment to them as requested.

We have now been informed that two (2) of our Residents have tested positive for COVID-19. As with any situation regarding a specific Resident, we are first in contact with the family or power of attorney (POA) for the Resident; if an RN has not been in contact with you, then your loved one is not impacted.

Our employees have been adapting extremely well to the changes we have implemented over the last few days to ensure containment of the situation.

We are very thankful for the support and guidance of Public Health and the vast number of experts we are able to access.

We are also thankful for the support, kindness, and prayers of our many community members who have reached out to us.

Sincerely,

The VGM Management Team
